Accountant: Deloitte Accountants B.V.
Supervision: AFM/DNB

Objective

The EV Micro Companies Growth Fund is a long-only equity fund that aims for an average return in the long term (at least 5 years) of at least 10% per year after deduction of all costs incurred by the fund

Strategy

The fund will invest in shares of small, European, listed companies with a market capitalization of less than € 500 million, so-called 'micro caps'. The focus will be on companies from the Netherlands, Belgium and Germany. These companies need to offer an attractive growth potential for the long term and fit within the megatrends as selected by the fund manager: Automation, Mobility, Energy transition / Climate and Demography. These are trends that (will) have a major impact on society in the long term and are less sensitive to the influence of the economic cycle. Investments will be selected based on fundamental analysis, looking at both qualitative and quantitative aspects of a company. The portfolio will be concentrated and consist of a maximum of 20 positions. Investments in the portfolio are made with an investment horizon of five years. A unit holder in the fund should preferably maintain an investment horizon of at least five years.

Fund Characteristics

Minimum investment

The minimum investment sum is € 100.000 in case of direct subscription; € 25.000 when subscribing via a private bank.

Payment and costs

Management fee: 0.3% per quarter
